

The background of the slide is a close-up photograph of industrial machinery. It features several glowing red and yellow components, likely heated metal parts or sensors, set against a dark, blurred background. The lighting is dramatic, with strong highlights on the glowing parts and deep shadows elsewhere.

General Presentation 2020

SSM Schärer Schweizer Mettler AG

Operations / July 2020

Rieter Group – Premium Textile Components

SSM Textile Machinery is a subsidiary of the Rieter Group based in Winterthur. The business unit RCO is represented on the market through five top brands; for further information please visit www.rieter.com

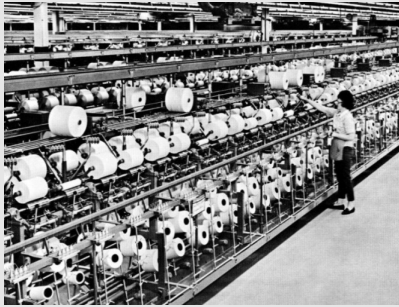

SSM: Who are we?

SSM has accumulated an experience of over 400 years of company history

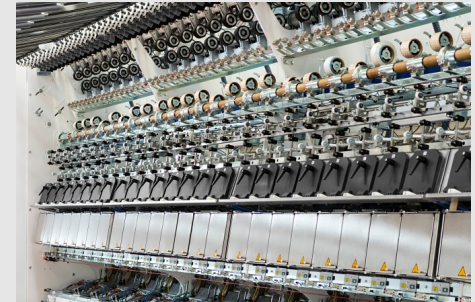

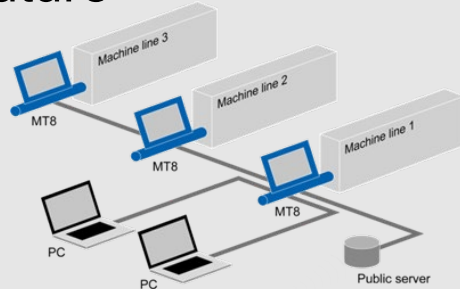

A Long History in the Textile Business

From the beginning in the mid 19th century

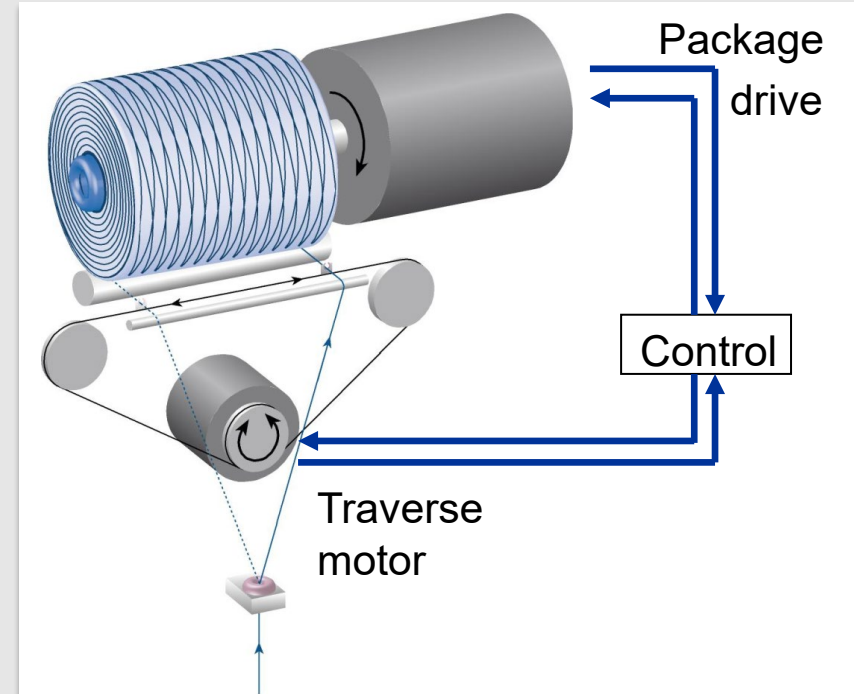

...to the future

SSM's Core Competence: Precision Winding

- High flexibility to produce made-to-measure cross-wound packages
- Change of the traverse length, the spool size as well as the crossing ratio without big efforts
- Up to 950 double strokes/minute
- The well established SSM-technology cuts maintenance and service costs to a minimum
- Inventor and technological leader with more than 20 years of experience in electronic yarn traverse systems

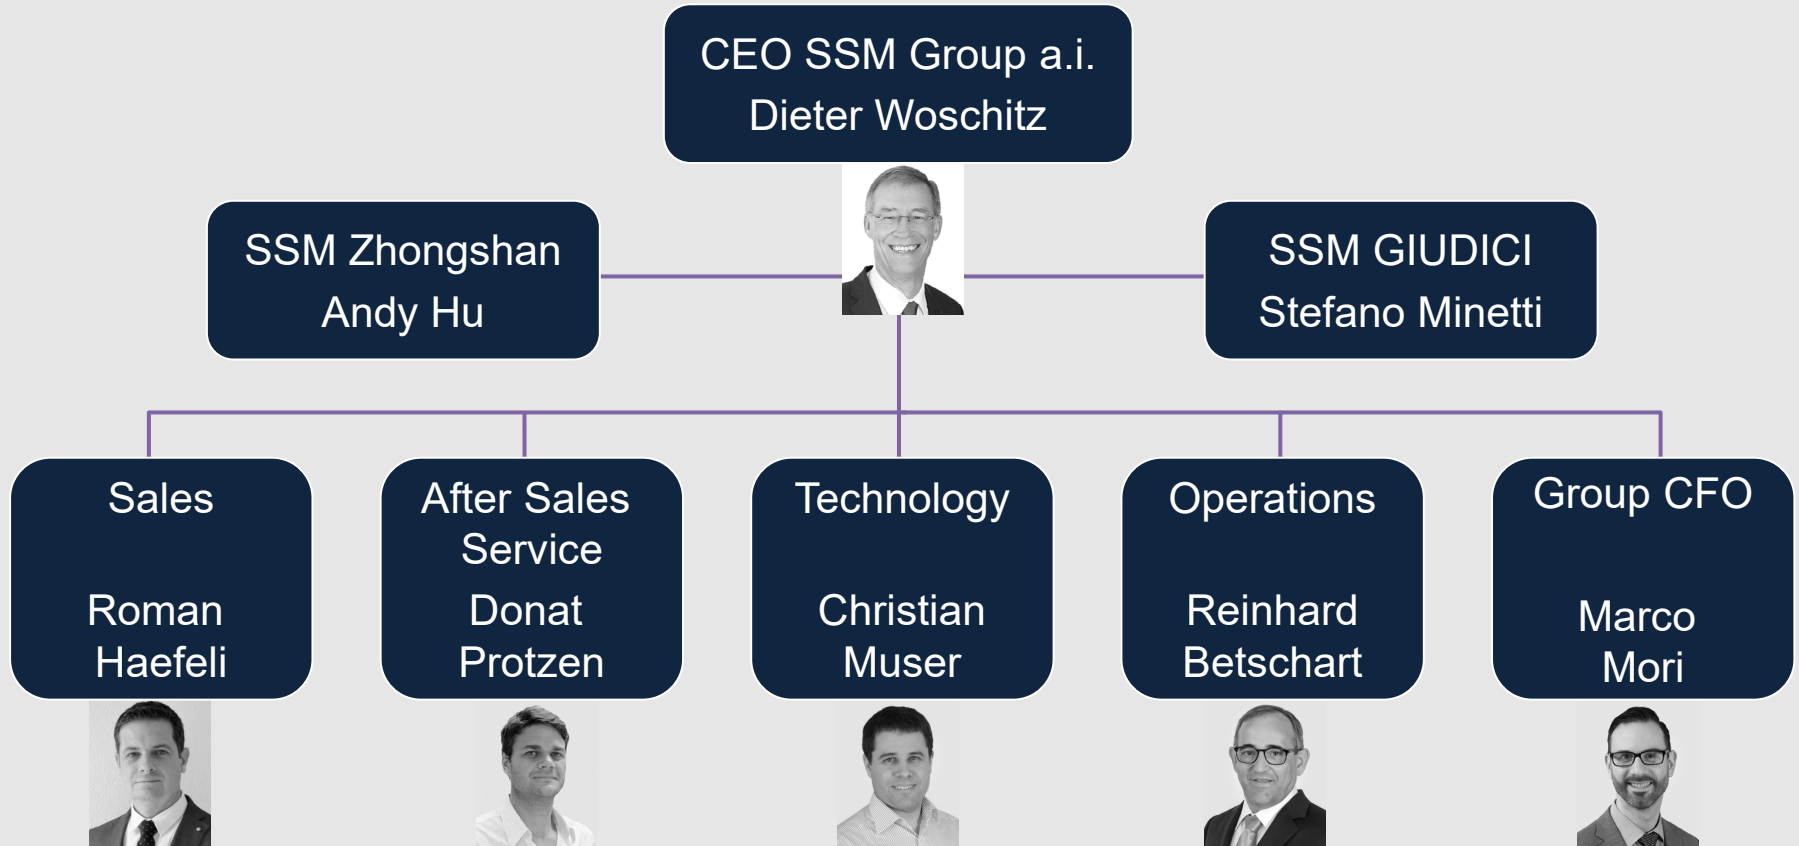

Strong Global Presence for Best Support

more than 10 local service stations and 80 agencies worldwide

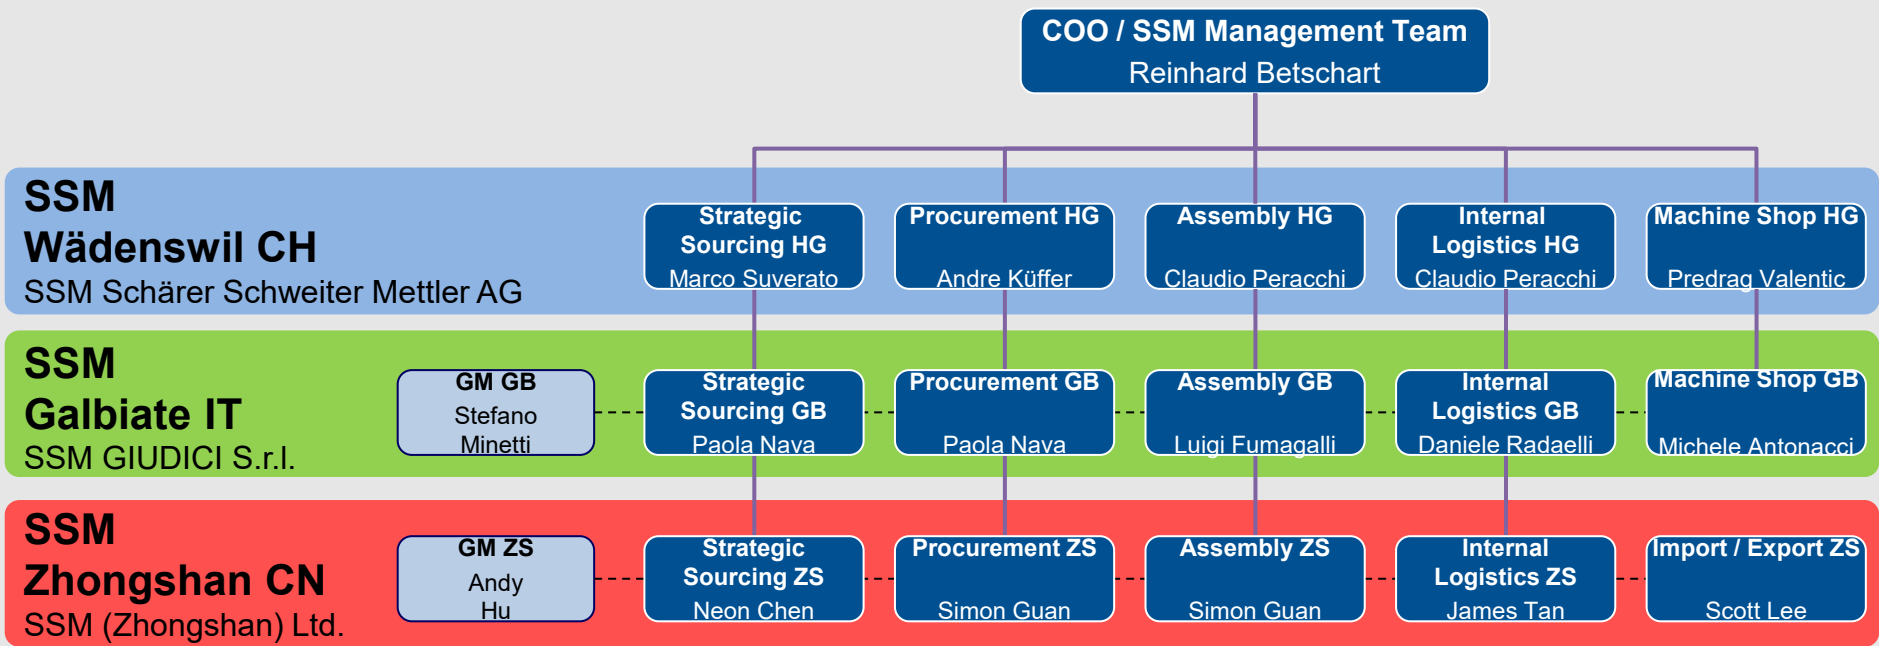

- Headquarter in Wädenswil
- Subsidiary in Galbiate and Zhongshan
- Representative offices in Hong Kong and Spartanburg
